Market leading AI detection technology

AI Filtering

People detection of up to 100 metres during the day

The AI Smart Tower from RED CCTV boasts Ultra High Resolution CCTV cameras with Pan Tilt Zoom support and recording for a minimum of 30 days. CCTV images processed by revolutionary Artificial Intelligence reducing unwanted alarms. Alarm filtering that allows you to determine what you receive alarm notifications on, meaning you can choose different objects and schedules and monitor the activity on your site 24/7.

The system can be hybrid or solar powered and provide security in the most remote locations, built in dual SIM VPN encrypted router means the site is secure and the system is protected from any cyber threats. Multiple systems can be linked together on sites to be viewed seamlessly on multiple devices.
